

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning at line 24 of page 35 as follows:

In the individual embodiments in Figs. 1 to 15, the passages for the flow of a gas in the hydrogen tank 1, 111 may be provided on the proximal-end side first lid portion 7, 41 of the liner 3 instead of the distal-end side second lid portion ~~[[8]]~~ 9, 42. In this case, it is unnecessary to provide the passage for the hydrogen gas on the distal end side of the liner 3, thus making the fabrication of the liner 3 simpler.
